Historical country estate with sea views above Cala Estellencs - Tramuntana

You find this historic country estate in the heart of the Tramuntana mountains, overlooking the sea in the front and it appears perfect for its magical location and enviable views. With its 311 hectares, it is one of the most important properties of the Tramuntana mountains, declared a World Heritage Site by UNESCO. The focal point of the four-storey 1,520 m² main building is the classic Sa Clastra patio. This unique noble estate offers a variety of traditional room styles, lounges, outbuildings, cellars, dining rooms, kitchens, a historic defense tower and a Mediterranean landscape richly endowed by nature with its olive, carob, pine, fruit and oak trees. At that time, the owner of this possessio (property) was obliged by the order of the king to provide at least 2 knights with 2 horses

Ref.: ESTHFVF304

in order to notify and protect the king in the event of a sighting danger on the coast. The property was on the Camino Real that connected Puigpunyent and Estellencs and therefore had an important strategic role. The photos in our exposé correspond to the current situation and it is now up to the new owner to give the property a new shine and to enjoy the fascinating sunset.
