Hybrid master townhouse with pool and sea views in Ses Salines - new innovative concept

This unique hybrid townhouse is being built where dreams merge with reality or where Mallorcan tradition meets technical sophistication.

Efficiently innovative, sustainably equipped with the latest technology and in a Mediterranean design, it offers 3 bedrooms, 2 bathrooms, guest toilet, a spacious lounge with fireplace, American kitchen with kitchen island, room air conditioning, hybrid underfloor heating, air purification pump, photovoltaic system and heat pump, garage with integrated Wallbox / charging station for electric cars, terraces, patio and a glass-front pool that fuses the elements of water and stone.

It is accessible from two sides of the street.

From the panoramic roof terrace you can enjoy a refreshing view of the pool and the Mediterranean all the way to the neighboring island of Cabrera.

In the immediate vicinity you find the small trendy town of Santanyi, the villages of Llombards,

Ref.: SSAVTAS590

Colonia Sant Jordi, the fishing village of Cala Figuera, the sandy bays of Cala Santanyi, Cala Llombards and the well-known natural beach Es Trenc.

Completion of this unique townhouse is scheduled for end of 2024.

Innovation in our office:

You can already take a look at your new home in a virtual 360 degree reality tour.
